

EESW Series

600W Intelligent Wind Turbine Controller

Applications

EESW series is wind power controller, and it can be applied to wind power generation system. It can control the wind turbine generation to charge the battery in a efficient and safe way.

Features

- Can be applied to independent wind power generation system and wind monitoring system.
- Integrated with other solar controller to be a wind&solar hybrid street light controller system.
- Simple structure, small volume, and cost effective.
